

Dine Out Service Option Guide

1. Social distancing should be maintained when putting a pickup/dine out system in place. The use of tape, floor signs, or other methods to keep customers six feet apart are useful tools.
2. Per the [Governor's Executive Order](#), consumption of food and drink must be done off premises.
3. Prevent customers from coming inside of your establishment whenever possible.
4. Establish a phone or an online order capability.
5. Have orders ready to avoid crowds of five or more during pick up.
6. Place an employee at your front door to communicate with and deliver food to customers.
7. Staff should continue to wash hands frequently even if only handing packages to customers.
